## **For Immediate Release**

### **California Sunlight Corporation Hosts Solar BBQ In Support of 17<sup>th</sup> Annual National Solar Tour**

(Sacramento, California, September 10, 2012) – California Sunlight Corporation joins the American Solar Energy Society (ASES) and hundreds of organizations throughout America to showcase solar energy technologies and more than 5,000 solar-powered homes, schools and businesses – in Sacramento and across North America -- for the 17<sup>th</sup> Annual National Solar Tour, the world’s largest grassroots solar event.

The event, slated for October 6 and 7, showcases the solar technologies your neighbors are using to drastically reduce monthly energy bills and to reduce harmful carbon emissions.

“Learning about clean energy options that lower energy bills and provide cleaner communities for all of us is something Sacramento residents can do to address America’s addition to fossil fuels,” Said Dr. Bing Gu, CEO of California Sunlight Corporation. “The ASES National Solar Tour shows families and businesses real-life examples of how their neighbors are harnessing free energy from the sun to generate electricity, warm and cool their homes, heat water, cook foods and slash monthly utility bills,” he said.

On October 6 and 7, California Sunlight Corporation will hold open house tour of solar powered BBQ at 3791 Power Inn Road in Sacramento.

The self-guided tours last year attracted more than 150,000 people in 49 U.S. states and Puerto Rico. Tours afford participants the direct perspectives of homeowners about the costs, processes and economic and environmental benefits of going solar. The tours also give visitors a glimpse at how a variety of solar systems look in and around structures with different architectural styles.

“Our nation sends \$24.9 billion a month to foreign nations to sate its oil addiction,” said ASES Member Richard Burns, “In recent years, calamities in the United States and around the world call into question our policies for harvesting oil and coal, and running nuclear plants. The National Solar Tour is a collaboration of unprecedented proportion to help Americans address the growing need for electricity and clean transportation. It demonstrates an array of clean, effective, practical and economical solutions available right here, right now.”

This Tour is free and open to the public. Learn more about sponsoring, hosting or volunteering for a tour in your community at: [ases.org/tour](http://ases.org/tour).

**ABOUT CALIFORNIA SUNLIGHT CORPORATION:**

California Sunlight Corporation develops cost-effective and user-friendly small scale solar energy systems including solar powered BBQ, solar cooking systems, active daylighting, and micro CPV systems. [www.California-Sunlight.com](http://www.California-Sunlight.com)

**ABOUT THE AMERICAN SOLAR ENERGY SOCIETY:**

For more than 50 years the American Solar Energy Society has led the renewable energy revolution. It is the nonprofit organization dedicated to increasing the use of solar energy, energy efficiency, and other sustainable technologies across North America. ASES leads national efforts to promote solar energy education, public outreach, and advocacy. [www.ases.org](http://www.ases.org)
